Classroom provides a wealth of resources that meets the varied needs of both students and teachers. In two groups, students complete questions on their worksheet with the correct comparative or superlative form of the adjectives in brackets. Next, each student pairs up with someone from the other group. Without talking, students predict their partner's answers to the questions and write them down on the worksheet. The table below shows the example of Gallium, which Mendeleev called eka-aluminium, because it was the element after aluminium. Scandium and Germanium were the other two elements discovered by 1886, and helped to cement the reputation of Mendeleev's periodic table. The final triumph of Mendeleev's work was slightly unexpected. 18/06/2022 · email protected] 18/06/2022 · email protected] In two groups, students complete questions on their worksheet with the correct comparative or superlative form of the adjectives in brackets.
